

## **REGIONAL CIRCULATION ELEMENT (CE) MAPS**

Attachment A provides a countywide summary of the Proposed CE Road Network for GP2020, which is the network associated with the August 2006 Draft Land Use Map. Information in Attachment A is organized as follows:

### *List of Figures:*

- A-1: Proposed CE Road Network – North County Communities
- A-2: Proposed CE Road Network – East County Communities
- A-3: Proposed CE Road Network – Backcountry Communities

### *List of Tables:*

- A-1: Summary of Differences between the Proposed and Board Map Networks
- A-2: Proposed Road Network Summary
- A-3: Board Map Network Summary
- A-4: Base Year 2000 Network Summary
- A-5: Comparison of Percent of Failing Road Segments

## **LEVEL OF SERVICE SUMMARY**

LOS tables in Attachment A provide a countywide summary of lane miles in the Proposed CE Road Network forecast to operate at a failing LOS for the August 2006 Draft Land Use Map. The largest percent of lane miles operating at LOS E/F are the North County freeways followed by the East County freeways. North County has more than twice the percent of total LOS E/F roads than the other two counties combined. In contrast, Backcountry communities are forecast to operate with virtually no lane miles of LOS E/F roadways.

LOS tables in Attachment A also provide a countywide summary of lane miles in the Board Map Network forecast to operate at a failing LOS for the August 2006 Board Alternative Map. Staff recommended a change to the CE network for the Board Map Network only when forecast models showed new LOS E/F road segments. Under those circumstances, newly deficient roads were upgraded. However, if a road was accepted as operating at LOS E/F on the Proposed Road Network, then no change was recommended for the Board Map Network unless traffic volumes increased substantially.

**BOARD MAP NETWORK**

Illustrated changes for the proposed Board Map Network are included on community maps in Attachment C. A summary of those changes is shown in Table A-1 on the following page.
